

Wireless Solutions for Dynamic Network Projects

Gain a Sustainable Competitive Advantage

Wireless connectivity continues to open the gates to new business possibilities, increasing the demand for turnkey wireless services that expand across different areas, yet remain connected in the most seamless way.

Network Connex leverages the expertise of Advantage Engineers, CCSI Networks, Fairhaven Integration Services, VERTICOM, and NTI to provide turnkey digital communications infrastructure services, including industry-leading wireless services.

Our robust wireless services portfolio includes architecture & engineering, project management, site acquisition, construction management, and construction & maintenance.

With a full range of capabilities, deep market presence in all major U.S. markets, and Professional Engineers (PE) licensed in all 50 states, Network Connex is solidly positioned to accelerate the performance excellence of MNOs, MSOs, OEMs, and more.

Our customers gain a sustainable competitive advantage by working with a reliable and regional infrastructure solutions provider able to support long-term growth, while adhering to the highest-level of safety and data security standards.

Wireless Solutions

Architecture & Engineering

- From engineering, structural analysis, and surveying/audit services to permitting and AAV/diverse fiber route design, our engineers perform at an expert level, every time.

Project Management

- Our experienced project managers successfully deliver on high-volume projects with aggressive schedules that stay on course and on budget.

Site Acquisition & Real Estate

- Expert team members navigate negotiations, the regulatory process, zoning, and permitting tasks to ensure projects are on target and goals are met.

Construction Management

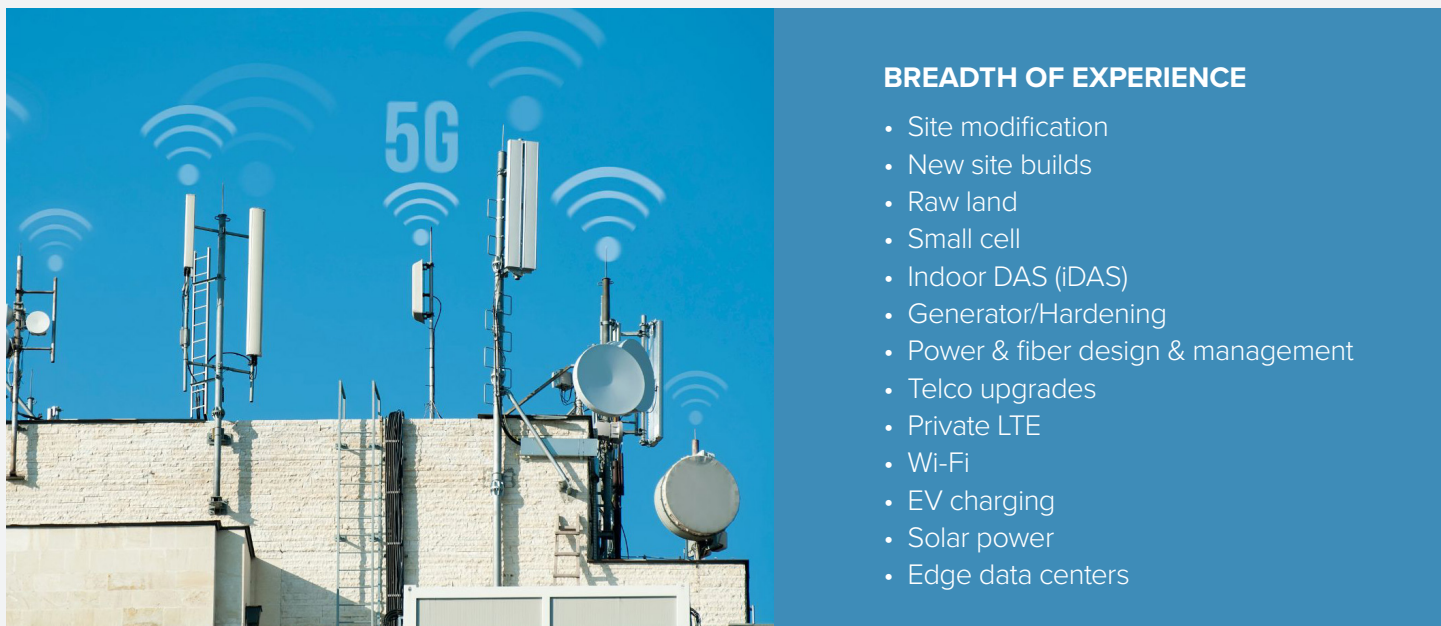

- We execute, manage, and inspect every aspect of the construction process from concept to completion to keep complex projects on schedule and to get sites on air.

Construction & Maintenance

- We offer a premier in-house technical staff that performs all aspects of macro tower, iDAS, and small cell construction at the highest level.

Our Partners

- MNOs
- Build-to-suit/tower companies
- Neutral host operators
- OEMs
- Municipalities & public utilities

BREADTH OF EXPERIENCE

- Site modification
- New site builds
- Raw land
- Small cell
- Indoor DAS (iDAS)
- Generator/Hardening
- Power & fiber design & management
- Telco upgrades
- Private LTE
- Wi-Fi
- EV charging
- Solar power
- Edge data centers
