

Unleashing the Power of Safe, Highly Trained Teams

Building and maintaining today's data networks requires trusted partners who can deliver with safe, highly proficient field teams. With innovative and comprehensive training, safety and quality systems, Network Connex offers a clear advantage in project efficiency and quality.

A dedicated Training, Safety & Quality (TSQ) team owns the processes that keep our workforce safe and prepared to exceed our customers' expectations. They ensure job safety and quality by assigning, delivering, and tracking safety and technical training for our technicians.

TSQ remains a dynamic force by:

- Adapting to ever-evolving operational and customer needs.
- Rapidly responding to any safety incident.
- Developing and communicating urgent or new guidance.
- Serving as subject matter experts to all teammates.

Our Training, Safety & Quality (TSQ) team ensures employees on our jobsites have the required OSHA and technical certifications to meet or exceed regulatory compliance and get the job done safely.

Network Connex's commitment to training and safety is key to building mutually beneficial partnerships with the most respected telecom and enterprise organizations.

Safety first

Safety is a core value of our business and we strive to send each employee home whole and well to their loved ones each day. Our comprehensive program is highlighted by:

- Proudly maintaining a low injury rate and EMR.
- Top-level commitment, and a growing team of qualified safety pros.
- A comprehensive health and safety management system with written policies and compliance software.
- Focus on identifying root cause and/or contributing factors.
- Perspective that employees work safely to stay injury-free, not just to stay compliant.
- Daily project safety briefings and job hazard analyses.
- Empowering every employee to stop work if they notice a safety risk.

Training for the future

TSQ keeps on top of new industry trends and emerging technologies to support quality customer work with appropriate field training and to deliver learning and efficiency for our non-technical teammates.

- Industry certification—Our workforce stays certified and meets customer project quality standards.
- State-of-the-art training facilities—Including hands-on laboratory work and assessments.
- Extensive course options—Our learning library empowers staff to stay qualified or work toward career advancement.
- New hire training—Video bootcamps and tutorials quickly get new technicians up to speed on work expectations.
- Non-technical training—Tutorials help office teammates efficiently navigate internal systems and software.
