

Delivering Excellence in Data Center Deployments

Triggered by technological advancements, the data center market is experiencing explosive growth.

In the foreseeable future, co-location, enterprise, hyperscale, and edge data centers will continue to drive massive investment in digital infrastructure.

Network Connex and their wholly-owned subsidiary, National Technologies (NTI), provide depth of experience in core infrastructure design, structured cabling, power, and installation for your mission-critical data center build-outs – all while adhering to the highest-level safety and data security standards.

With a full range of capabilities, deep market presence in all major U.S. markets, and seasoned professionals in all ranks, Network Connex is solidly positioned to deliver infrastructure solutions to today's most sophisticated data center companies.

Our expertise in handling both ISP (inside plant) and OSP (outside plant) work affords us visibility and control, leading to predictable, high-quality, and speed-to-market implementations. We have decades of experience and offer support 24/7/365 through knowledgeable and efficient project managers, installers, technicians, and support staff. Our superior service wins us repeat business with some of the world's most sophisticated network and data center companies. We're one team, your team.

**Specializing in data center,
headend, and central office.**

Network Connex is your single source for mission-critical data center build-outs. With resources throughout the U.S. and the ability to serve international clients, we are committed to providing our partners and customers with regional assets, exceptional support, superior industry knowledge, and the rapid response needed for successful outcomes.

Data Center Solutions

Our Solutions

- Multi-tenant facilities
- Edge data centers
- Private data centers
- Cable landing stations

ISP Services

- Core infrastructure
- Backbone cabling installation
- Overhead strut & grid systems
- Basket tray & ladder rack
- Fiber tray
- Meet-me-rooms
- Common area cabling
- Security cabling & device installation

- Fiber splicing & termination
- Materials logistics
- Testing & documentation
- Design & engineering

Data Hall Infrastructure

- Cabinets & racks
- Grounding & bonding
- Hot & cold aisle containment
- Cage walls
- Rack & stack
- Fiber & copper structured cabling
- Patching
- AC/DC power
- Network configuration

Relationships are the cornerstone of Network Connex's philosophy and approach to doing business. We focus on developing long-term relationships with customers, employees, and suppliers.
