NETWORK CONNEX

networkconnex.com

Wireless Infrastructure Solutions

for Dynamic Network Connectivity

Wireless connectivity continues to pave the way for greater broadband access and new business possibilities. Network Connex helps build wireless infrastructure to increase 5G coverage and density required by video, AI, and IoT technologies. Our engineering and deployment teams also support satellite broadband and EV charging networks.

Trusted Support for Every Phase

Multidisciplinary teams work with you to design and implement solutions for longevity and future innovations while meeting aggressive schedules and fixed budgets. From initial project planning, to deployment, project closeout, and ongoing maintenance of wireless networks, our professionals apply deep technical knowledge to alleviate the complexities of wireless infrastructure projects. We work across the U.S. and have the geographic reach to manage single site projects to national rollouts.

Gain a Sustainable Competitive Advantage

Collaborating with a reliable turnkey partner can increase efficiency and results by proactively addressing risks and planning for the future. Comprehensive support from Network Connex empowers you to achieve sustainable wireless growth within a changing landscape.

Turnkey Wireless Solutions

Architecture & Engineering

- Site design & engineering
- Civil, structural & electrical drawings & analysis
- Surveying & site audits
- AAV/diverse fiber route design

Site Acquisition & Real Estate

- Lease preparation and negotiations
- Regulatory & zoning processes
- Permitting
- Utility coordination

Project & Construction Management

- Project & complex program management
- Construction project management
- Bid package coordination
- Daily GC oversight & reporting

Deployment & Construction

- Site clearing & leveling
- Site grading & drainage
- Access road construction
- Building & tower foundations
- Tower assembly & stacking
- Utility & power coordination
- Grounding & power work
- Equipment & generator installation
- Tower lighting installation & commissioning
- Close out review & documentation
- Site repair & maintenance

Our Customers

- Wireless carriers & MNOs
- REITs
- Satellite broadband providers
- Build to suit/tower companies
- Fiber network operators
- Broadband providers
- EV charging networks
- Neutral host operators
- Municipalities & public utilities
