

Be AI-Ready with Turnkey Data Center Infrastructure Solutions

Sparked by cloud computing and AI demands, investment in co-location, enterprise, and edge data centers will continue for years to come. On budget, on time data center deployments call for a trusted partner who is with you every step from project kick off to close out.

As a true turnkey provider, Network Connex handles white space build out, cabling, and network infrastructure installation for critical infrastructure clients. You get a predictable, efficient, and high-quality implementation working with a partner equipped to manage inside (ISP) and outside plant (OSP).

We staff projects with personnel trained to our exacting standards. Leveraging our size and footprint across the U.S., Network Connex delivers consistent, unmatched results across locations and projects through:

- Centralized leadership
- Customer-centric programs
- Tailored training
- Proven processes & project controls
- Safety as a core value

Every day, dedicated project managers, technicians, and operations leaders translate decades of specialized expertise into secure, sustainable data infrastructure.

“The finished project surpassed all expectations and looked absolutely stunning. Their attention to detail and commitment to delivering a flawless outcome were evident in every aspect of their work.”

— Edge Project Lead
Global cloud computing company

Data Center Deployment Services

Network Infrastructure

- Core infrastructure
- Backbone cabling installation
- Overhead strut & grid systems
- Basket tray & ladder rack
- Fiber tray
- Meet-me-rooms
- Common area cabling
- Security cabling & device installation
- Fiber splicing & termination
- Materials logistics
- Testing & documentation
- Design & engineering

White Glove Services

- Rack & stack
- Cabling audit & certification
- Network configuration/commissioning
- Decom/recomm & relocations
- Acceptance testing & documentation
- Remediation
- IT asset disposition (ITAD)

Data Hall Infrastructure

- Cabinets & racks
- Grounding & bonding
- Hot & cold aisle containment
- Cage walls
- Rack & stack
- Fiber & copper structured cabling
- Patching
- AC/DC power
- Network configuration

Outside Plant

- Cable placement
- Conduit & duct bank installation
- Subducting
- Manhole/handhole placement
- Excavating, boring, drilling
- Proofing & blowing
- Complete splicing & testing capabilities

Our Customers

- Colocation & multi-tenant data centers
- Edge/micro data centers
- Hyperscalers
- Enterprise & on-premise data centers
